Waldmann
ENGINEER OF LIGHT.

**PARA.MI**
TASK LUMINAIRES

# ONE LUMINAIRE, MANY OPTIONS. PARA.MI ENSURES OPTIMAL LIGHTING AND MAXIMUM INDIVIDUALITY IN THE OFFICE WITH A RANGE OF BASIC FORMS AND COLORS THAT CAN BE COMBINED FREELY.

Office environments today are characterized by flexibility, mobility, and new technologies. This is why suitable lighting concepts have to offer solutions for different zones and areas – attuned to work content, job profile, and the personal needs of the user.

"Only a change of perspective clears the way for something new," says designer Burkhard Schlee of Schlee Design. With PARA.MI, the designer is setting new standards together with Waldmann in terms of bringing individuality to the table: The task luminaire allows individual elements and colors to be combined into one individual whole, however you want it. A round or square luminaire head, adjustable single or double arm, round or square base, and various connection possibilities for furniture, combined with high-quality surfaces. With PARA.MI, personal design features and adjustments for the modern office environment have no boundaries.

The characteristic joints are an especially attractive feature in an otherwise unobtrusive design: These maintenance-free, self-locking joints allow a high degree of adjustability. A bright LED lamp creates homogeneous, wide-angle task lighting. The neutral light is glare-free thanks to a specially developed reflector. In addition, with only 8 W of installed consumption, PARA.MI is an outstanding energy-saving measure.

PARA.MI is characterized
by its clear and timeless design:
The luminaire head is limited to
a simple rectangular form
with gently rounded edges.

It is not only the shape and variety of colors that make PARA.MI so impressive, it also comes with a number of practical functions: The luminaire head can be pivoted and turned. The distinctive self-locking joints – with adjustable double arm in this case – are continuously flexible and completely maintenance free. All parts can be moved simply and effortlessly. All in all, a range of product features that are proven in the modern, efficient office.

PARA.MI also cuts a dash in the home office. And just the way you want it, with luminaire head, arm, and standing base – shown here in silver for example with easily adjustable arm and rectangular luminaire head.

Modern, self-contained, circular. The PARA.MI variant with the round luminaire head also has a consistently minimalist and timeless look.

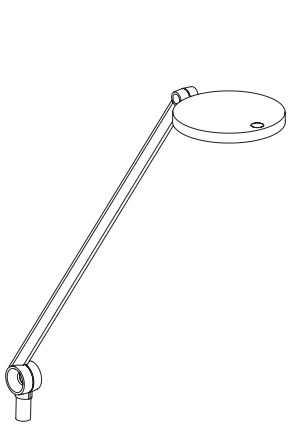
An all-round well-rounded affair: With high luminous power and low energy consumption, PARA.MI is the ideal solution for the efficient work station. The luminaire adapts to the different design needs of users thanks to its outstanding individuality. The luminaire head and joints combine to give an especially harmonious, uniform design in the PARA.MI round variant.

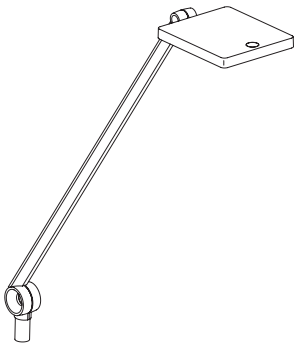
PARA.MI is fitted with a bright LED lamp that provides pleasant task lighting and an easily accessible dimming button. A specially developed highly reflective plastic reflector ensures glare-free working. What's more, even with such impressive performance figures, PARA.MI is surprisingly economical in terms of energy consumption, with only 8 W of installed consumption for an average illuminance of more than 700 lx.

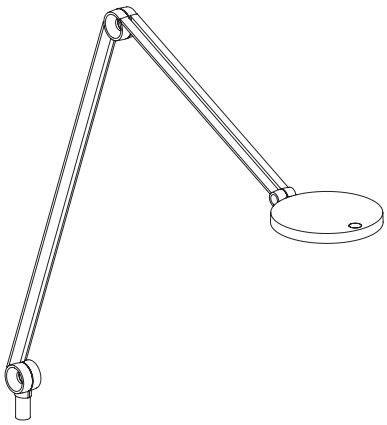
PARA.MI is youthful and fresh.
The red color as seen here adds a
cheerful touch to any work station
and in every architectural setting.

Standing, clamped, suspended: Thanks to flexible connection possibilities, PARA.MI adapts optimally to the individual architectural circumstances and existing furniture systems in the office. Apart from the classic luminaire base – optionally available as a rectangular or round variant – the luminaire can be connected to the desk or dividing wall using a clamp for example.

PARA.MI comes with a round or rectangular luminaire head, single or double adjustable arm and as an undercabinet variant for connection to a furniture system.







PARA.MI is available with a classic luminaire base (round or rectangular) with clamp connection (horizontal or vertical) as well as the option to connect to a furniture rail system (horizontal or vertical).
